

1 MAY 2023

NATIONAL LAW UNIVERSITY, JODHPUR

End Term Examination April-May 2023

Semester: UG VIII (Optional)

Energy Law

Time: Three Hours

Marks: 100

*Instructions:*

- 1. This question paper contains six questions. You are required to answer any FIVE.*
- 2. Students must start each answer by clearly identifying to which question they are responding.*
- 3. You must follow the Examination Protocol.*

Q.1). Discuss 'access to electricity' as a basic human right in the light of relevant international documents and judicial pronouncements.

(Marks 20)

Q.2). Discuss the issues and challenges in the Renewable Energy Governance in India

(Marks 20)

Q.3). What are the advantages of nuclear energy? Discuss the various stages of nuclear energy programme in India.

(Marks 20)

Q.4). Explain the notion of Permanent Sovereignty over Natural Resources. Does the notion stand in the way of cooperation among States, which may ensure that international issues are addressed in the interest of the international community, and international energy markets? Is the demand for sovereignty centered only on the legal conditions as they exist within the host country, or does the application in practice extend beyond the countries frontiers and imply that binding commitments involving international institutional cooperation should be accepted?

(Marks 20)

Q.5). Discuss how the price of oil and gas are determined in the international energy market?

(Marks 20)

Q.6). Define Energy Law and discuss the interface between national and international energy law.

(Marks 20)
